OBJET/SUBJECT: Additives

A. WHIST

Attached is copy of the "final" version of the Canadian industry's policy paper on additives. The Information Commissioner has accepted the industry's proposal "in principle", as has the complainant (a journalist from the Calgary Herald). As such, this portion of the issue should be resolved within a month. There is a second complainant (a CTV journalist) who could conceivably appeal the decision and the acceptance of the position by the Information Commissioner does not necessarily guarantee that Health and Welfare will agree. That battle has yet to be waged.

Cordially,

Synthia von Maerestetten
